How to use ReFissa® Tretinoin Cream, USP (Emollient) 0.05%

To get the full effect of ReFissa, use it for at least 24 weeks.

**STEP 1** Each night, gently wash your face with a mild soap or cleanser and pat dry.

**STEP 2** Let your face dry for 20 to 30 minutes before applying ReFissa.

**STEP 3** Squeeze a pearl-sized amount (1/4” in diameter) of ReFissa onto your finger.

**STEP 4** Dot ReFissa onto cheeks, forehead, and chin. Spread evenly. Avoid the eyes and the skin around the ears, lips, and nostrils.

**What to expect month by month.**

0-1 As ReFissa begins to work, it may produce redness, flaking, and irritation. Many people find the signs of irritation end after a couple of months. If your skin becomes too irritated, consult with your doctor, who may suggest you try using it every other night. Then resume nightly treatment when you can.

1-2 You may notice that skin is smoother and has a softer texture.

3-4 Irregular pigmentation may begin to lighten, while fine facial wrinkles may begin to diminish. You may see an overall improvement in the texture and appearance of your skin.

You may continue to see and feel your skin texture and skin tone improve.

6-12 Continue to use ReFissa nightly and apply sunscreen daily (SPF 15 or higher).
Try these skin care tips while using ReFissa®.

- Maintain your current skin care program of soap or cleanser and daily sunscreen.
- Continue your usual makeup routine.
- Avoid the sun (including sunlamps) and always use a sunscreen (minimum SPF 15) when outdoors—even on a cloudy day.
- Avoid hair and face products that contain alcohol, astringents, menthol, spices, or lime. These ingredients may irritate your skin.
- Avoid using electrolysis, hair depilatories, or waxes on your face.
- Keep hair dye or permanent-wave solutions off your face.
